

Hannah Munguia-Flores

SOAP Note

Prepared by Dr. Nicola Ducharme, ND on September 24, 2024
Session date September 24, 2024

Plan

Lab Testing Recommendations:

- Labcorp - G6PD (has requisition).
- Ask PCP for iron and ferritin bloodwork.

Medication Recommendations:

- Continue with current protocol.

Supplements Recommendations:

- Restart glutathione, smilax, detox #2, and start Energy Multiplex now (can start those at the same time).
- 4 days later - start HM Complex. Hold off on Mycopul for right now.
- 4 days later - restart teasel root. Add CSA formula (20 drops twice daily) and Houttynia tincture (20 drops twice daily). they can be mixed with your other herbal tinctures. They replace Artemisinin SOD and HH2 Formula.
- 4 days later - restart Biocidin LSF. Add BioDisrupt - 2 capsules once daily on empty stomach.

Future Plan:

- Methylene blue pending G6PD results (low dose because of prozac).

Follow-up Session:

- 4 weeks.

X
